CM-CIC Market Solutions, No. 2 in the 2019 StarMine Analyst Awards from Refinitiv for the quality of its French Equity Research

CM-CIC Market Solutions has once again been recognized in the annual StarMine Analyst Awards ranking of the best French brokers. Our equity research office received six awards, and holds the No. 2 spot for most-awarded brokers, out of around twenty research firms.

Five analysts in our research team are recognized, and took first place in the various rankings:

- Agnès Blazy: No. 1 Overall Best Earnings Estimator;
- Jean-Baptiste Bouchet and Alexandre Plaud: both awarded No. 1 Top Earnings Estimator for the Software & IT sector, and No. 2 Overall Analyst Top Earnings Estimators;
- Jean-Christophe Lefèvre-Moulenq: No. 1 Top Earnings Estimator for Construction and No. 9 Overall Analyst Top Earnings Estimators;
- Christian Devismes: No. 1 Top Stock Picker for Hotels & Leisure.

Based on StarMine methodology, this annual survey measures the quality of financial analysts based on the returns of their recommendations and the accuracy of their earnings estimates. This ranking is based on the performance of sell-side financial analysts in their respective sectors.

CM-CIC Market Solutions wishes to congratulate its equity research teams, which have been ranked regularly in the Top 3 for the StarMine Awards since 2005. These new awards further demonstrate the quality of CM-CIC Market Solutions' research office.
